

Your Path

to Enterprise AI

Enterprise AI is more than a set of technologies – it's a new way of doing business that brings agility and intelligence to the modern organization. Now more than ever, successful businesses are those that can quickly adapt to the changing world and human behaviors around them by:

Enabling people with AI wherever and whoever they are.

Supporting a spectrum of AI use cases, from self-serve analytics to operationalized models in production.

Building sustainable AI systems that are governable and open to changing needs and technologies in the future.

64% of executives believe that AI is considerably or very important for the future of their businesses. For AI leaders, this number skyrockets to 98% of executives.

...and more!

Dataiku, a single platform for...

Everyone

- Data Scientists
- Data and ML Architects
- Data Engineers
- Business Analysts
- Analytics Leads
- Business Stakeholders

...and More !

Every use case

- Marketing, Sales, & Advertising
- Customer Service
- Human Resources
- Content Recommendation
- Anomaly / Fraud Detection
- Supply Chain Optimization
- Predictive Maintenance
- New Business / Product Exploration & Development
- Data Governance & Security

...and More!

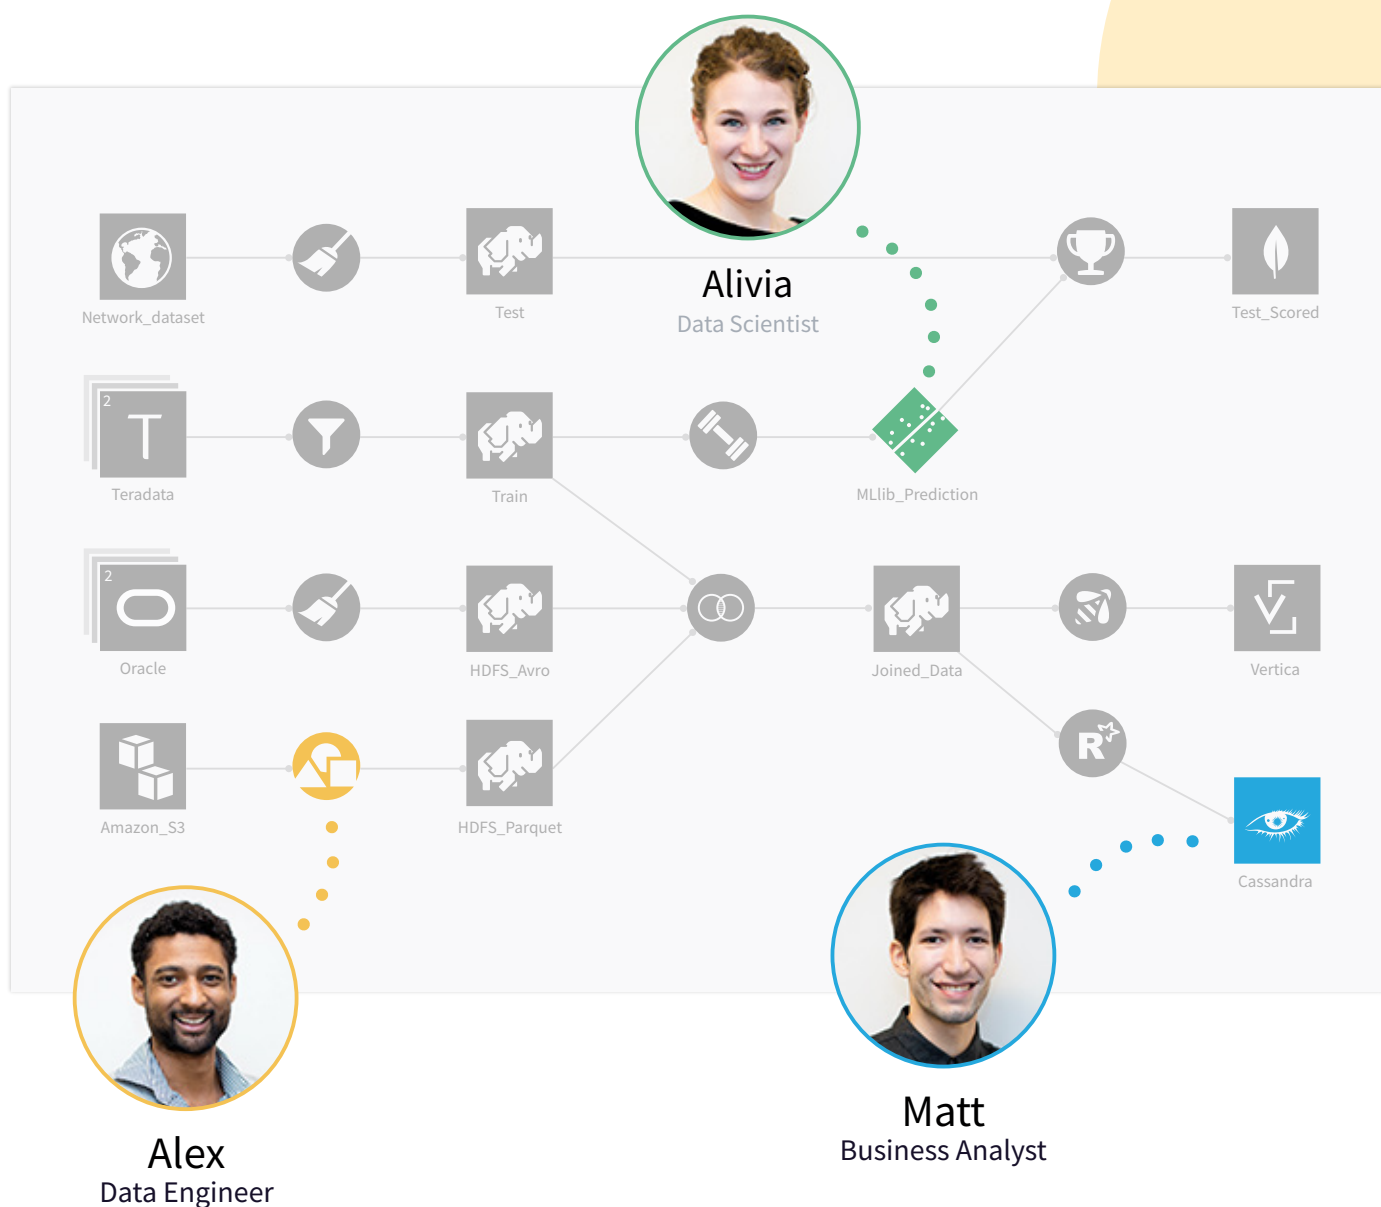

Every industry

- Transportation & Automotive
- Media & Entertainment
- Retail, E-Commerce, & Consumer-Packaged Goods
- Banking & Insurance
- Manufacturing
- Healthcare
- Pharmaceuticals

- Utilities
- Gaming
- Public Sector

...and More!

Dataiku is the only AI Enablement and Operations Platform offering one simple end-to-end interface:

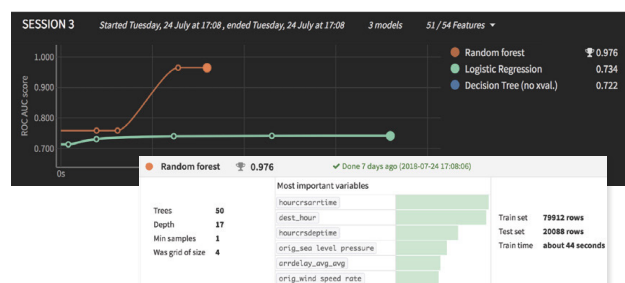

Name	Sex	Age
Natural lang.	Gender	Integer
Braund, Mr. Owen Harris	male	22
Moran, Mr. James	male	38
Heikinen, M.		26
Futrelle, M.		35
Allen, Mr. V.		35
McCarthy, M.		
Hewlett, M.		29

Cleaning & wrangling

- Perform mass actions on data in a simple, interactive environment.
- Leverage a rich library of built-in processors for advanced and custom processing.

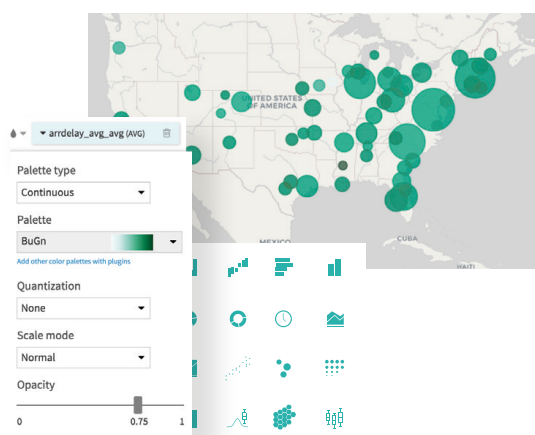

Building & applying machine learning

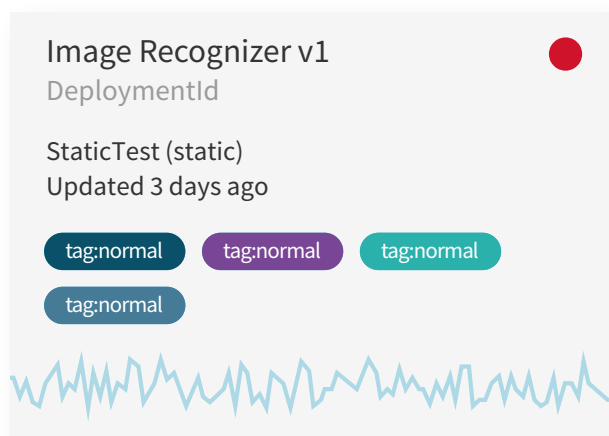

- Use AutoML powered by state-of-the-art machine learning libraries (Scikit-Learn, MLlib, TensorFlow, Keras, etc.).
- Customize code directly in Python and R for advanced custom machine learning.

Mining & visualization

- Get immediate visual insights with built-in chart formats or go custom with interactive Python, R, and SQL notebooks.
- Mine at scale with Spark & Hadoop.
- Publish and share insights with business stakeholders via dashboards.

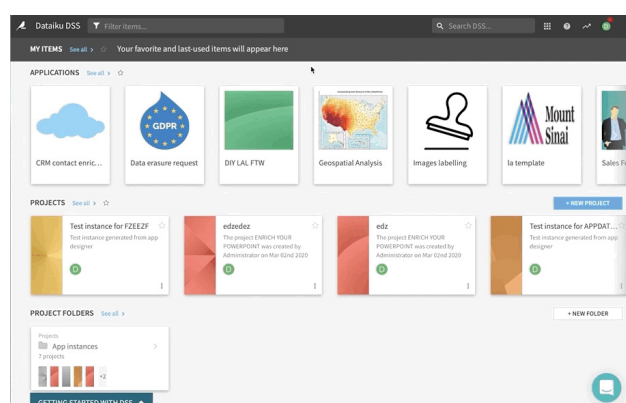

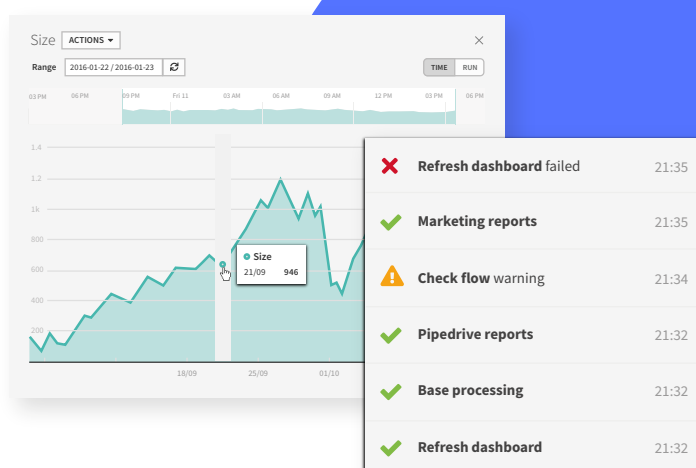

Deploying to production

- Deploy models in one click on the cloud with Kubernetes.
- Handle large quantities of real-time predictions with queuing, parallelism, and load balancing for a scalable and highly available solution

Monitoring (MLOps)

- Run multiple versions of the same model at the same time for automated A/B testing.
- Access history of log queries and predictions at any time to check that model performance is not drifting with time.

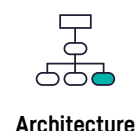

Consuming Insights

- Business stakeholders can leverage charts and dashboards for simple insights.
- Highly customizable Dataiku Apps and Webapps (leveraged as an API) power smart insights for AI consumers.

From Raw Data to Business Impact

Designed for the Enterprise

ENTERPRISE
LEADERS

- Get business and tech to work together
- Capitalize and reuse for AI at scale
- Automate analytics for a self-serve business
- Create thousands of analytics apps
- Trace your data end-to-end
- Deploy without compromising on security and auditability

"[Dataiku] has enabled us to run projects with advanced analytics and data scientists to deliver insights to the business that can make a real impact."

_Advanced Analytics Engagement Manager in the Healthcare Industry

BUSINESS
EXPERTS

- Integrate any data 10x faster
- Build and automate sophisticated data pipelines
- Build and share insights in minutes with charts and dashboards
- Perform in-depth statistical analysis
- Create thousands of models to find the best one
- Explore and explain models

"You [will] never be able to hire enough data professionals to meet the data demands of the business, so instead, why not turn the business into data professionals."

_Jonathan Tudor, Director - Data and Analytics @ GE Aviation

TECH
EXPERTS

- Storage and compute agnostic
- Any IDE, Git-enabled
- Spark and Kubernetes clusters, fully managed (at scale)
- Powerful extensions via Dataiku Plugins
- Build a robust data architecture, end-to-end
- Automate and monitor with APIs

"The most beneficial thing about Dataiku is having everything in one place, so you don't have to go from one program to another to another and have them work all at the same time. Dataiku takes away that hassle."

_Ayca Kandur, Data Scientist @ Aviva
